# CZECH GRIPEN OFFSET – THE STORY SO FAR

## FACTS ABOUT GRIPEN OFFSET PROGRAMME

- The Programme runs from 14. 6. 2004 to 31. 12. 2014, i.e. little over 10 years.
- Offset obligation is 25.5 billion CZK which represents 130 % of the value of the lease payments for Gripen aircraft.
- All aspects of the Offset Programme are governed by the Agreement on the Programme of Industrial Cooperation ("Contract") which is a bilateral contract concluded between Gripen International and the Ministry of Defence of the Czech Republic ("MOD"). Czech offset legislation applies as well in the form of Minister of Industry and Trade Decree No. 3/2005 ([www.mpo.cz](http://www.mpo.cz)).
- The Offset Programme is composed of individual offset transactions that are included into the Programme over the course of its life. As of 31. 12. 2009 there were 46 registered Gripen offset transactions, details of which are below.
- Offset as defined by the Contract and the legislation does not mean direct investment. Offset is either the value generated by the investment or it is export contracts for Czech companies or technology transfers that generate Czech revenues.
- Offset transactions values are confirmed annually in June for the previous calendar year. They are either the net export value generated in connection with new export contracts or net sales of goods or services created based on the investment.
- The Contract also stipulates what are the milestones that must be met over the course of the Offset Programme and also what are the penalties applied in the event of failure.
- MOD has the final power to approve or reject offset transactions and offset values within the Programme. The Ministry of Industry and Trade is the administrator and technical guarantor of the Offset Programme together with the multi-ministerial Offset Commission. Gripen International as submitter of offset transactions must prove causality.
- BAE Systems provides the Czech Offset delivery team and is contractually responsible to Gripen International for the timely delivery of the offset requirement.

**The Gripen Offset Report shows the officially approved cumulative value as of 31. 12. 2009 as exceeding 19.92 billion CZK. This represents 78 % of the total offset obligation.**

### Total Offset Obligation: 25.545 billion CZK

- Milestone 1:** the achieved cumulative value of the Programme shall correspond to at least 20 % of the commitment
- Milestone 2:** the achieved cumulative value of the Programme shall correspond to at least 48 % of the commitment and the achieved cumulative value of Direct Transactions shall correspond to at least 9.6 %
- Milestone 3:** the achieved cumulative value of the Programme shall correspond to at least 100 % of the commitment and the achieved cumulative value of Direct Transactions shall correspond to at least 20 %
